ABOUT ME

I am really interested in programming. I'm very passionate and dedicated to improve myself. I enjoy every step of the design process, from discussion and collaboration. I spend almost 9-10 hours per day developing software. Sometimes, if I have a problem about my project, I try to solve that project without sleeping until morning. My only goal is that to make the world a better place for all of us.

WORK EXPERIENCE

Date

I will update this area as I gain experience.
